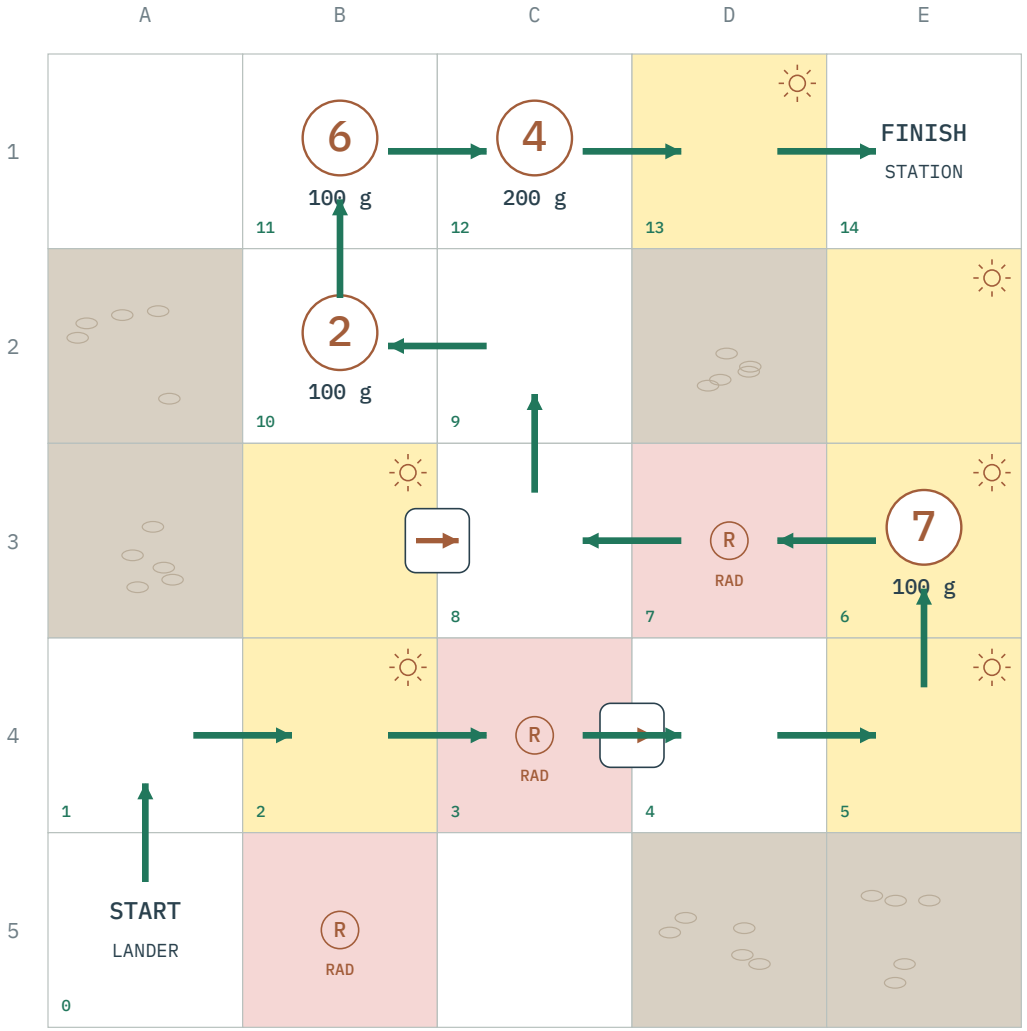
ROVER / TERRAIN SURVEY

SECTOR K-17 / GRID NAVIGATION

BATTERY 30/30

RADIATION LIMIT: 2



DESIGNER ROUTE

Candidate extraction: 7264

14 moves; 2 rover exposures. Battery remaining: 1.

Revisits are allowed. This is an example route, not a unique path. Step numbers begin at 0.

Ledger and validation details appear on the next page.

Fictional terrain / game rules

Physical playtest pending

Sun: +1 on entry

Shade: no recharge

R: exposure

Blocked

Arrowed border: cross only in its direction. Other open borders work both ways.

ROVER / ROUTE LEDGER

DESIGNER ONLY - candidate, not an assigned game answer

STEP	CELL	CARGO g	MOVE COST	SUN +	BATTERY	ROVER R
0	A5	0			30	0
1	A4	0	1	0	29	0
2	B4	0	1	1	29	0
3	C4	0	1	0	28	1
4	D4	0	1	0	27	1
5	E4	0	1	1	27	1
6	E3	100	1	1	27	1
7	D3	100	2	0	25	2
8	C3	100	2	0	23	2
9	C2	100	2	0	21	2
10	B2	200	2	0	19	2
11	B1	300	3	0	16	2
12	C1	500	4	0	12	2
13	D1	500	6	1	7	2
14	E1	500	6	0	1	2

Final sample exposures: 7: 1, 2: 0, 6: 0, 4: 0.

Cargo is shown after pickup. Battery is shown after the solar credit.

Revisits allowed: exhaustive resource-state search finds one successful pickup order. Multiple walks can work; this is one example.
Checked states: 9039. Successful pickup orders: 1.

Each entered sun/radiation square applies its effect again. A sample is collected once; revisits never reset its exposure.

All figures describe this fictional puzzle. No physical/player test performed.
