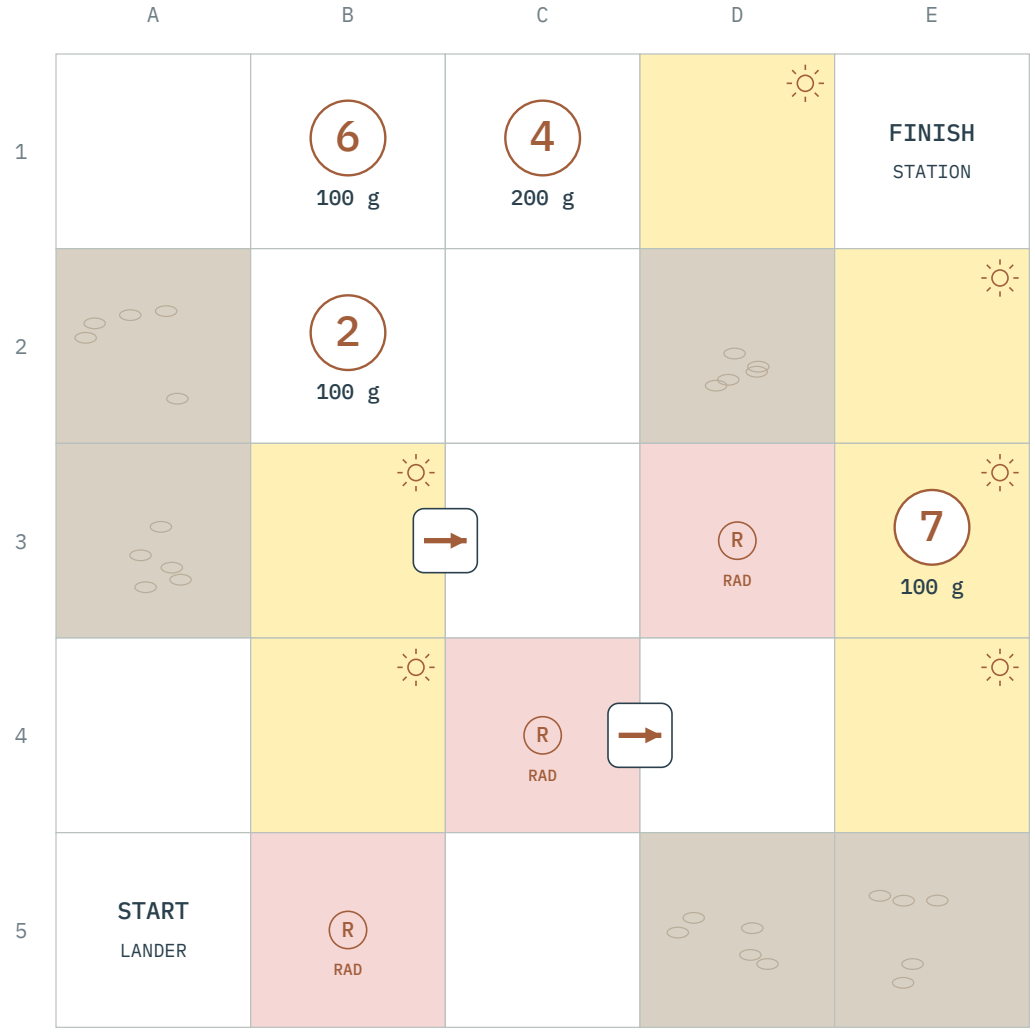
# ROVER / TERRAIN SURVEY

SECTOR K-17 / GRID NAVIGATION

**BATTERY 30/30** **RADIATION LIMIT: 2**



## Mission notes

I'd like to bring all four samples back to the station. The heavy ones will slow us down, so choose the order carefully.

Start at the lander with 30 battery. Move up, down, left or right. No diagonals, blocked squares or revisiting squares.

Before each move, pay 1 battery plus 1 for every 100 g already aboard. You must be able to pay the whole cost.

After entering a sun square, regain 1 battery, up to the maximum. No charging by waiting.

Collect each sample on arrival. Its weight counts from your next move. Keep every sample aboard.

Each R square entered adds one exposure to the rover and each sample already aboard. Rover limit: 2; each sample: 1.

Respect the slope arrows. Reach FINISH with all four samples. Read their large numbers in pickup order.

Bob

Sun: +1 on entry

Shade: no recharge

R: exposure

Blocked

Arrowed border: cross only in its direction. Other open borders work both ways.
