PREPARATION & FIT KEY

Designer only / revised square board and narrow frames

Print all files at 100% / Actual size, single-sided. Disable Fit / Shrink.
The chart page is 8 x 8 inches. Centre it on letter paper, then trim square.
The note page is 4 x 6 inches. Centre it on letter paper, then trim to size.
Print the frame sheet on opaque cardstock. Its scale bar must be 1 inch.
Cut each outer solid contour; remove its complete dashed interior.
Retain every arrow and both labels. The band is 7.5 mm wide.
Give players the square chart, all three prepared frames and the note.
The named stars remain on the chart and note; frames say only MAIN STAR.
All three frames sit together in the intended positions shown below.

Counts: Lyra 6 / Cygnus 9 / Aquila 8. Key above is reduced.

At reset, return the chart, all three frames and the observation note.

Checked digitally: frames are disjoint at their correct positions; all target dots remain visible; no island or printed dots in Aquila's central triangle. Fit evidence uses all four marks and the note's named-star mapping. Geometry is uniformly enlarged 18%; no positions or constellations are independently moved. Physical cutting, alignment and player testing remain pending.
Date/time/location on the note are deliberately blank. The dated count-order clue and final envelope code remain unassigned. This note supplies star pairings.
