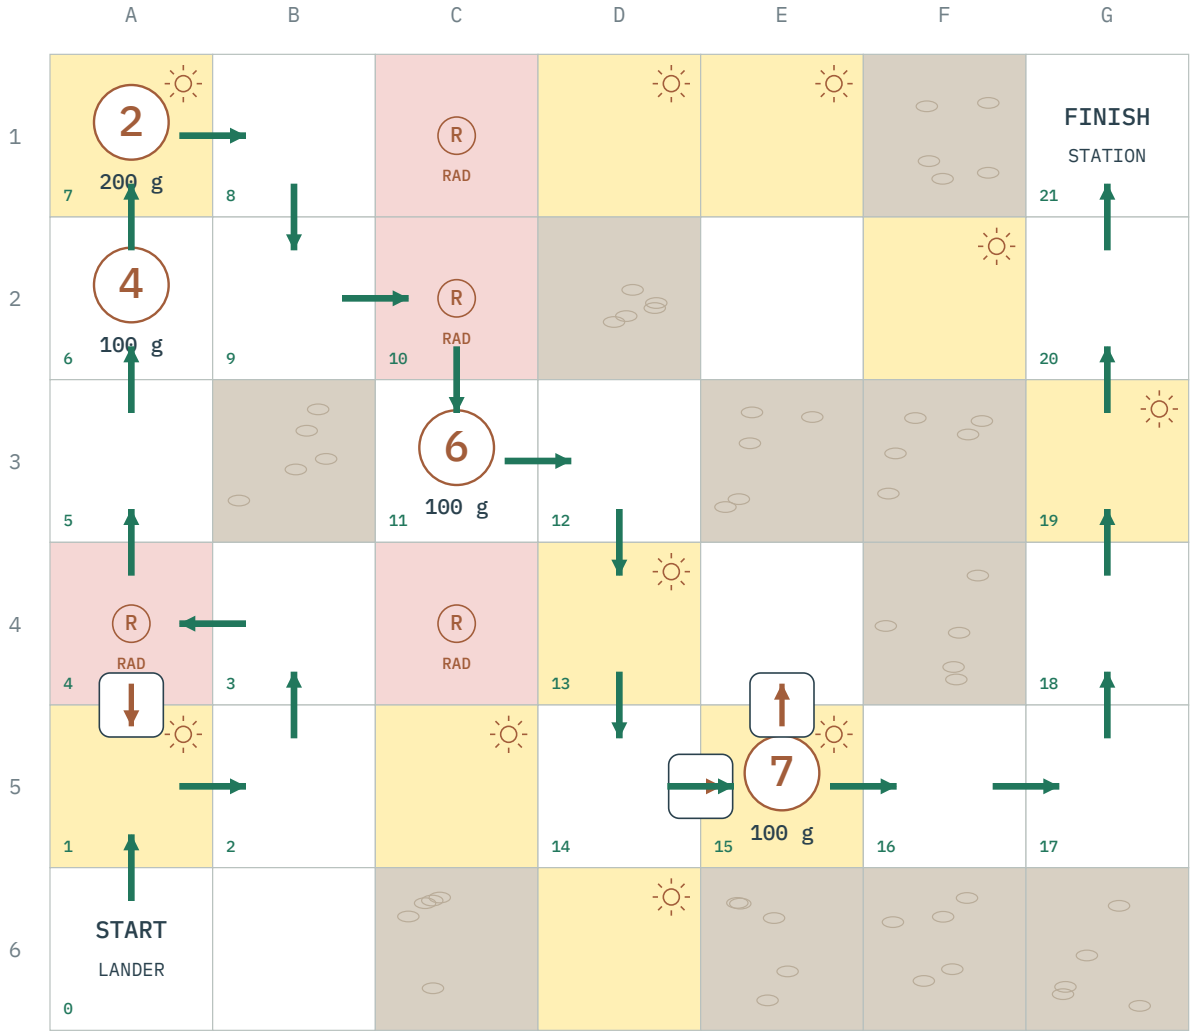
ROVER / TERRAIN SURVEY

SECTOR K-17 / GRID NAVIGATION

BATTERY 75/75

RADIATION LIMIT: 2



DESIGNER ROUTE

Candidate extraction: 4267

21 moves; 2 rover exposures. Battery remaining: 0.

Only one route survives the full rule check. Step numbers on the map begin at 0.

Ledger and validation details appear on the next page.

Fictional terrain / game rules

Physical playtest pending

Sun: +1 on entry

Shade: no recharge

R: exposure

Blocked

Arrowed border: cross only in its direction. Other open borders work both ways.

ROVER / ROUTE LEDGER

DESIGNER ONLY - candidate, not an assigned game answer

STEP	CELL	CARGO g	MOVE COST	SUN +	BATTERY	ROVER R
0	A6	0			75	0
1	A5	0	1	1	75	0
2	B5	0	1	0	74	0
3	B4	0	1	0	73	0
4	A4	0	1	0	72	1
5	A3	0	1	0	71	1
6	A2	100	1	0	70	1
7	A1	300	2	1	69	1
8	B1	300	4	0	65	1
9	B2	300	4	0	61	1
10	C2	300	4	0	57	2
11	C3	400	4	0	53	2
12	D3	400	5	0	48	2
13	D4	400	5	1	44	2
14	D5	400	5	0	39	2
15	E5	500	5	1	35	2
16	F5	500	6	0	29	2
17	G5	500	6	0	23	2
18	G4	500	6	0	17	2
19	G3	500	6	1	12	2
20	G2	500	6	0	6	2
21	G1	500	6	0	0	2

Final sample exposures: 4: 1, 2: 1, 6: 0, 7: 0.

Cargo is shown after pickup. Battery is shown after the solar credit.

Exhaustive search: exactly one valid route. To check that each rule matters, the solver also removes one rule at a time:
No solar credit: 0 valid routes.
No cargo penalty: 2 valid routes.
No radiation limits: 14 valid routes.
Rover limit only: 3 valid routes.
Ignore slope arrows: 6 valid routes.

All figures describe this fictional puzzle. No physical/player test performed.
